### 1 Sanitary Disposal Service:

The Spree sanitary bin is a manually operated sanitary bin with a specially designed lid that helps catch the disposable goods and keeps feminine hygiene waste out of sight. The granulated order balls that are located in the internal part of the bin helps to maintain hygiene and prevent unpleasant odours. We have a range of sanitary disposal solutions available and easily fit into any toilet cubicle. The sanitary bins come in two sizes, regular and compact.

PRODUCT CODE SDC-001

### 2 Nappy Disposal:

Spree's Nappy Disposal units provide your parent bathrooms and feeding rooms with a hygienic option for the disposal of nappy's, eradicating those undesirable odours. We manage the nappy waste with care and ensure that it meets with all the EPA guidelines.

PRODUCT CODE NDS-002

### 3 Nappy Change Tables:

Spree's Nappy Change Tables are foldaway tables that can be wall mounted and ideal for those confined spaces. Our baby change tables are well equipped with a safety harness to provide a safe and hygienic place to change nappies. Our change tables meet Australian Standards and they can be purchased directly from Spree or you have an option to enter into a rental agreement. Our baby change tables come with a life time guarantee and can hold up to 102kgs.

PRODUCT CODE NCT-003

### 4 Soap Dispensing Service:

Spree's modular soap dispensers come in 2 re-fill sizes - 650mL or 1L - and the appropriate size is normally determined by the number of visitors to your washroom. Our modular system can be used for a variety of soaps from liquid soap to foam soap and even spray soap to name just a few. The soap dispenser is wall mounted and can be positioned in a location within your amenity that is user friendly and convenient.

PRODUCT CODE SDS-004

### 5 Air Freshener Service:

The Air Pure air freshener works by activating oxygen into ozone and dispersing it into the washroom environment. The unstable ozone gas attacks the unpleasant odour molecules and breaks them down. As the Ozone gas has powerful neutralising properties, a chemical reaction occurs when the ozone gas encounters unpleasant odours, leaving pure air and a pleasant smell in your bathroom. The powerful neutralising properties of the Air Pure air freshener does not simply mask smells but eliminates them. It is the ideal air care solution for pan rooms, parents rooms and heavily used washrooms. The Air Pure air freshener needs to have a 240v power point available.

PRODUCT CODE AFS-005

### 6 Antibacterial Toilet Seat Wipes:

Many people try different ways to avoid contact with germey toilet seats while using them. This may include messy habits such as spreading the toilet paper or thicker hand towels on the seat, which can leave a huge mess in the toilets. The hand towels can also block your plumbing! Some people believe that toilet seats are so germey that they don't sit on them at all. Ecowipes give the individual the choice to safely clean the toilet seat before use. They are complex toilet seat wipes that kill all harmful bacteria and give the user some insurance in hygiene. Ecowipes are safe to use on other surfaces that require sanitizing Air Freshener Service.

PRODUCT CODE ATSN-006

### 7 WC & Urinal Sanitizing Service:

Flushing your urinals means that bacteria from deposited urine, spreads in the air through tiny water vapours which can cause contamination and bad odours in the toilet and washroom. Our WC & Urinal Sanitizing systems are designed to clean pipes and urinals to prevent malodours and the build-up of bacteria, lime scale, and uric acid. The units sanitize areas where normal cleaning cannot reach. The WC and urinal sanitizer provides an automatic and continuous touch-free hygiene maintenance program for toilets and urinals, 24 hours a day continuously cleaning all surfaces exposed to flushing water, and actively attacking hard water and mineral deposits. It reduces and prevents scale and stains from forming and kills germs thus reducing or eliminating odours.

PRODUCT CODE WCUS-007

### 8 Syringe Disposal Service:

It is illegal to throw away syringes in the general rubbish bin. Failure to follow this law can result in an expensive fine and can harm or even kill others. We can help you meet the safety standards by supplying you with this sturdy solid steel unit. It is lockable so once a syringe goes in, it doesn't come out, until we deposit it under the regulatory guidelines. It holds 1.4 L and is also available in 2L and 5L. This compact and stable unit will look exceptional in your washroom or clinic. We do a full service including installation and maintenance. We follow legal EPA regulations.

PRODUCT CODE SYDC-008

### 9 Deep Cleaning:

If your urinal is smelly and dirty because of the accumulated uric acid build up over the years, this means that you require a deep cleaning service. Spree Enterprise has the professional and technically advanced service operatives to deep clean urinals, removing acidic build up, bacteria and odours, leaving it smelling new and fresh. This service is performed using special machinery tools and chemicals to suit the type of urinal and working conditions, penetrating deep into the system, softening any build up of stains and uric acid deposits on the urinal walls, steps, trough and drain pipes. Spree Enterprise offers a leading array of hygiene solutions you can depend on to deliver a comprehensive, customised service. Our comprehensive range of specialised and innovative washroom services and products ensures that your facilities and other critical areas are kept fresh and hygienic all year round.
