CREATING TOMORROW

Our **Multi-skilled Services** provides a one stop solution for all you facilities non-core soft service maintenance, resulting in substantially reducing operating cost by eliminating the need to coordinate and manage multiple contractors and relying on a single multi-skilled technician who plays a integrated role in servicing the facility.

Our specialised service operative is put through a proprietary training course specifically designed for Spræ. At the successful course graduation, our employees are granted a multi-skilled operative certificate and equipped with knowledge, know-how and training to execute multiple soft non-core services covering:

- Cleaning
- Gardening
- Washer replacement
- Toilet unblocking only
(Excluding Licensed Plumbing Works)
- General handyman such as small repair works, painting and touch ups.

The Concept In Action.

Essentially one person has the skill set to perform all the day to day soft service facility tasks. Your facilities can either house a single multi-skilled service operative or a resident team of multi-skilled operatives, depending on the scope, nature and size of your facilities. For instance many of our high rise apartment buildings house a live-in multi-skilled service operative, whilst the smaller shopping centres house teams of 2 to 4 multi-skilled service operatives. We also provide hotels with a facility and care taking service that enables them to concentrate on the core business whilst we look after their back end operation.

Overall the **Multi-Skilled Service** concept has produced incredible benefits for our customers and in particular enormous cost savings. Our **Multi-Skilled Services** are not a standard package, so we have the flexibility of designing a tailored solution that best suits your specific needs.
