CREATING TOMORROW

We Deliver Optimal Quality through our SERP IT System.

Our commitment to quality has gone one step further as we embarked on developing our customised SERP Information Technology System. Delivering Optimal Quality through our SERP IT System is the key objective and our proprietary IT systems enables integrated management functionality across all the facets of the business.

You are able to look into your very own screen and view specific data related to jobs and contracts that will include documentation and reports on Quality, OHS and Environmental. The Periodic Program Maintenance Schedules is set up in the system and a reminder will be emailed to you 12 days before the service will be performed. You are also able to track work orders, service request and it gives you the ability to view any financial information.

SERP is
just another
innovative way
we deliver
industry-
benchmark
facility service
solutions.
